Frost Group

The big picture

For the work that matters, and the businesses behind it.

Frost Group brings branding, signage, safety and maintenance under one name and one standard. Multiple specialist divisions, run as a single accountable partner.

For clients who'd rather trust one team than manage five.

11 The divisions

16 Beta Signs

In just over 20 years, Frost has grown from a single operation into a nationwide group of specialists. And we're not slowing down.

Every division has been built intentionally.
We bring new capability into the group by investing in people, equipment and standards to keep our operation evolving.

We operate from a 10,000 sq ft facility with print, fabrication and specialist teams under one roof. We own the machinery and the space and run our own specialist teams, giving us control over quality, speed and cost.

Much of our work takes place in regulated environments where accreditation is a condition of entry. We hold the certifications these environments demand, backed by long-standing client relationships.

- Constructionline Gold
- RISQS, rail industry approved
- ISO 9001, ISO 14001, ISO 45001

Trusted.

Most projects mean appointing a designer, a manufacturer, an installer and a maintenance contractor, then managing the gaps between them yourself. With Frost, one group takes the brief, coordinates every stage and stays accountable from first survey to final sign-off.

The group advantages

01

Turnkey

One brief covers concept, manufacture, installation and upkeep.

02

Group operation

Project management and surveying handled at group level.

03

True specialists

Each division masters a single discipline rather than covering many.

04

One team

A single line of accountability, start to finish.

What holds it together

Some work doesn't belong to any single division, it's what ties separate services into one delivered project, and what stands behind the promise of a single partner.

Project management

A single contact, every trade coordinated.

Surveying

Measured, assessed and specified before anything is made.

Installation

Our own teams, including high-access and out-of-hours.

Concept to completion

Design through to maintenance, end to end.

The divisions

Each division is a specialist business in its own right: its own focus, its own colour, its own deep-dive brochure. Together they cover the full life of a space, how it looks, how it is protected and how it is kept.

Facilities Solutions

For the spaces working as hard as you.

Facilities Solutions keeps spaces and assets working and worth keeping: pest control, cleaning, decorating, refurbishment and the upkeep that protects what has already been built. The dependable backbone that runs in the background so nothing falls behind.

- Pest control, commercial cleaning and decorating.
- Asset installation, refurbishment and restoration.
- Stairway and overbridge care; mould treatment and removal.

See the Facilities Solutions brochure for more information.

Specialist Solutions

For the jobs others won’t take on.

Specialist Solutions handles the work that demands the right accreditation, the right method and the expertise to take it on. Graffiti and acid-etch removal, anti-graffiti and glass protection, heritage cleaning, floor safety and surfacing. Difficult, regulated, high-stakes work, delivered to standard.

- Graffiti removal, anti-graffiti coatings and acid-etch removal.
- Asset and glass protection; heritage cleaning.
- Floor safety and surfacing: slip testing, anti-slip, line marking.

See the Specialist Solutions brochure for more information.

Branding Solutions

For the brands that deserve to be seen.

Branding Solutions makes brands physical: signage, graphics, wraps, hoardings and large-format print. From a single fascia to a full site rollout, this is where a brand moves from screen to street.

- Signage, graphics, wraps, hoardings and large-format print.
- Concept and identity work through our Creative Services studio.
- Design, manufacture and install handled together.

See the Branding Solutions brochure for more information.

The group isn’t fixed at three divisions. Part of how we grow is by bringing established specialist businesses into the group, and backing them with our scale, standards and reach.

Beta Signs

Now part of the group.

Beta Signs is a premium architectural signage specialist which has recently joined Frost Group. Based in the Midlands, Beta strengthens our nationwide coverage and deepens our fabrication and specialist signage capability.

- Bespoke, fabricated and illuminated signage
- Wayfinding and architectural systems
- Specialist and high-access installation
- Consultancy, specifications, structural calculations and technical drawings

Beta retains its own name and reputation, backed by the scale of Frost Group.

See the Beta Signs brochure for more information.

Frost Group covers the entire process: design, manufacture, installation, protection and upkeep. Whether that’s one service or the lot, it comes from a single group held to a single standard.

We've come this far by doing the work properly.
Now we're building the group to do more.
More reach, more specialists, more ambition.

For the work that matters,
and the businesses behind it.

Let’s talk

Whatever the job, whether branding it, protecting it, maintaining it or making it, there’s one team behind it. Let’s talk about the work that matters.
