Facilities Solutions

The division

For the spaces working as hard as you.

Facilities Solutions is the dependable backbone of every space we look after: the cleaning, treatment, repair and maintenance that protects what's already been built. It's the work that runs quietly in the background, keeping sites presentable, compliant and worth keeping. Always there, and now backed by the scale of the group.

15	Sectors

The group behind it.

Facilities never works alone. Behind every job sits a single **accountable team, our own crews and the wider capabilities of the group. One brief covers everything, handled start to finish.**

The group advantages

01

Accountability

One line of accountability, from initial brief to final sign-off.

02

Team

Our own teams, including working at height and out-of-hours.

03

Group operation

Project management and surveying handled at group level.

04

In-house capability

Comprehensive in-house capabilities, nothing out of reach.

A photograph showing two workers in white protective suits and masks cleaning a wet outdoor area. One worker is on the left, leaning over a large glass door frame, while the other is on the right, bent over on a set of stairs. The ground is wet and reflective. The background features a brick wall and a blue metal railing.

Cleaning & Treatment

Removing what doesn't belong: pests, dirt, damp and mould. The work that keeps a space clean, safe and healthy to be in.

Pest control

Stop it before it spreads.

Birds and rodents put hygiene, compliance and reputation at risk long before anyone sees them. We proof, prevent and treat across commercial and regulated environments, keeping sites protected and inspection-ready.

- Bird proofing with spikes, netting and deterrents.
- Rodent proofing, treatment and removal.
- Ongoing monitoring and compliance for regulated sites.

Commercial cleaning

Clean that holds up.

A clean space isn't a one-off. It's a standard, kept day after day. We deliver routine and specialist cleaning across live environments, at height where needed, working around your operation rather than interrupting it.

- Routine and contract cleaning to a consistently high standard.
- Deep and specialist cleans where they're needed.
- Working at height and out-of-hours in live environments.

Mould treatment

Treated at the source.

Mould is a symptom, not the problem, paint over it and it comes back. We identify the cause, remove and remediate the affected areas, then treat to stop it returning, protecting both the building and the people in it.

- Identify and treat the cause, not just the surface.
- Removal and remediation of affected areas.
- Protective treatment to stop it returning.

A photograph of two maintenance workers in orange high-visibility suits standing on a platform. Above them is a white directional sign with black and red text. The sign points left to 'Toilets' and right to 'Platform 1'. Below the 'Toilets' text is a 'Way out' sign. The workers are looking up at the sign. The background shows a subway station with stairs and safety railings.

Maintenance & Restoration

Preserving and renewing what has already been built: installed, refurbished, decorated and kept safe, for a fraction of the cost of starting again.

Installation & refurbishment

Put in place, kept in shape.

We supply and install new fixtures and fittings, and refurbish tired, worn or damaged assets rather than replacing them. Measured, specified and fitted by our specialist teams, so it's done once and done properly.

- Tired or damaged assets brought back to their best.
- Public realm and commercial environments.
- A fraction of the cost of replacement, and better for the environment.

Stairway & overbridge care

Safe access, kept that way.

Stairways and overbridges are the routes people depend on every day, and the first to show wear, dirt and damage. We clean, maintain and care for them in demanding environments, often at height, including rail.

- Cleaning and maintenance of stairways and overbridges.
- Working at height for difficult locations.
- Rail-approved (RISQS) for transport environments.

Commercial decorating

A finish that lasts.

We deliver interior and exterior decorating to a commercial-grade standard, built to take daily wear and applied around your operation, out-of-hours where it needs to be.

- Interior and exterior decorating.
- Commercial-grade, hard-wearing finishes.
- Minimal disruption, out-of-hours where needed.

Commercial fit-outs

One team for the whole space.

Some jobs are bigger than a single trade. When a whole office or station needs a refresh, we take on the lot: flooring and tiling, kitchen and bathroom fit-outs, glass and stud partitions, decorating and lighting, window fitting, cleaning, protective coatings and hard-wearing public furniture. Delivered around your operation, out-of-hours if needed, so it gets done without shutting you down.

- Surveyed and specified before a tool is lifted.
- High-access work where the job demands it.
- Our own specialist teams.

Where we work

Facilities work is only as good as its track record. Ours runs across some of the most demanding environments in the country: regulated, public-facing and live throughout.

Rail & transport

RISQS-approved work across stations, depots and trackside.

Commercial & offices

Clean, maintained workplaces without interrupting the business.

Retail

Front-of-house standards held across busy, customer-facing space.

Education

Safe, well-kept schools and campuses, worked around timetables.

Public realm & leisure

Shared spaces kept clean, safe and usable.

Let's talk

Whatever needs keeping clean, safe or maintained, there's one team behind it.
Let's talk about the work that matters.
